

GenART feladat

A feladatot a **Leonardo AI** segítségével oldottam meg.

Felhasználói felület:

The screenshot shows the Leonardo AI Image Generation interface. At the top, there's a header "AI Image Generation" with a help icon. Below it, a search bar contains the text "unseen places". To the right of the search bar is a "Generate" button with a coin icon and the number "12". Below the search bar, there's a section for "Finetuned Model" showing "Leonardo Lightning XL" with a resolution of "1024x768". To the right of this are buttons for "Creative", "Add Elements", and "New". Further right is a toggle for "Add Negative Prompt". Below this section, there are tabs for "Generation History", "Image Guidance" (set to OFF), and "Prompt Generation". A message box states: "This tool will allow you to come up with more complex prompt ideas from a simple prompt. E.g. if you type in 'a car' and click Ideate it will come up with a number of more complex concepts which include a car." Below the message box, there's a section for "Number of Prompts to Generate" with buttons for 2, 4, 6, and 8. At the bottom, there's a text input field containing "unseen places" and a button labeled "Ideate". A status bar at the bottom right indicates "100 prompts remaining."
